

How we protect you from **Vectors**

A vector is an animal that can transmit disease or produce human discomfort or injury. **The Coachella Valley Mosquito and Vector Control District** aims to protect the public from vectors and vector-borne disease through surveillance, control, and public education.

District Services

Surveillance and Control of...

- Mosquitoes
- Red Imported Fire Ants (RIFA)
- Eye Gnats

Assistance and Guidance for...

- Other nuisance pests that threaten public health or safety

Mosquitofish at no charge for...

- Non-functioning swimming pools, ornamental ponds, and other suitable water sources

Public Outreach

We distribute information at fairs, events, schools, community centers, city offices, and presentations throughout the valley. We also keep the public up-to-date via news releases, videos, advertising, and on our website at www.cvmosquito.org.

Report neglected pools or standing water to the District at **(760) 342-8287** or www.cvmosquito.org
